✓ SUMMARY

UI/UX Designer and final-year B.Tech CSE-AI student with hands-on experience designing wireframes, prototypes, and design systems for a live, revenue-generating brand and product platforms. Comfortable owning the full design workflow - user research, user flows, high-fidelity mockups in Figma/Adobe XD - and collaborating with engineering to ship accurate implementations. Experienced with Gen-AI-assisted design tools for faster ideation, research, and prototyping. Seeking a UI/UX Design internship to contribute to real product interfaces in a fast-paced, high-ownership environment.

📦 EDUCATION

BTech CSE-AI at Parul University
2027

★ SKILLS

Figma, Adobe XD, Gen-AI Design Tools, Wireframing & Prototyping, User Flows & Journey Mapping, Usability Testing, Design Systems, Accessibility, Interaction Design, Stakeholder Collaboration, HTML/CSS/JavaScript, React, MongoDB, Node.js

<> PROJECTS

GYMSpace (Fitness Social Platform)

- Mapped user journeys and workflow flows for check-in, streak tracking, AI photo verification, and social feed - translating product requirements into structured user flows.
- Rapidly prototyped concepts in Google Stitch (Gen-AI-assisted ideation), then refined into high-fidelity, accessible mockups in Figma.
- Collaborated cross-functionally to implement designs in React Native/MERN with Firebase and Cloudinary, ensuring accurate design-to-dev handoff.

FocusForge

- Designed the scheduling interface for an AI-driven study planner, focusing on usability and making complex recommendations easy to scan and act on.
- Conducted basic usability analysis by building and testing the interactions end-to-end in a working Flask/SQL prototype, iterating on design based on real interaction data.

Belongos - Lead Designer

- Own end-to-end UI/UX and visual identity for a live, revenue-facing brand - website/product pages, wireframes to print-ready apparel graphics, and social assets.
- Built and maintained a consistent design system and brand guidelines across the "Vel Mar" collection, ensuring visual consistency across all touchpoints.
- Partner with stakeholders to translate business goals into design decisions; produce launch posters, copy, and promotional content, using Gen-AI tools to accelerate content and design ideation.
- Ran usability-informed SEO/content strategy that grew organic Instagram reach, iterating designs based on engagement feedback.
